

Health Recovery Plan

Your Health - Your Say

- Over the last year local communities have told us of key health issues that you want us to address.
- These issues have been identified through research and engagement with communities as being of importance to them.
- We are now having conversations with communities on whether the issues raised so far are right and what else should be included.
- The Health Recovery Plan will set out how we will deliver the needs identified.
- Please visit www.grenfell.nhs.uk to have your say on your health.

10 Health Recovery Themes:

- ✓ Provide healthcare for survivors/bereaved that focuses on the needs of the entire family so they can heal together.
- ✓ Create healthcare services that understand the importance of faith, ethnicity, culture and gender.
- ✓ Create health conversations on social media with young men and women so they tell us and access information about their health needs.
- ✓ Work with community/voluntary/faith groups to strengthen their health knowledge and support them to help the community.
- ✓ Prioritise vulnerable groups who may not seek help i.e. parents with young children and young men.

- ✓ Empower people to lead independent and healthy lifestyles.
- ✓ Promote our health and wellbeing services better.
- ✓ Help people manage their long-term conditions which may have worsened due to displacement and stress i.e. diabetes, COPD, alcohol/drug intake.
- ✓ Understand the impact of disasters on diverse, deprived and marginalised communities.
- ✓ Address emerging and or new health needs that may be identified in the near future

Questions to consider

- Do you think that these are the health themes most relevant to you?
- Are there any issues that we have not explained well?
- Are there any health issues missing from this list?
- How would you like to hear from us? E.g. emails, social media, newsletter or faith group?
- How might we better join up NHS services with the council?
- What can we do to reduce health inequalities?
- Any other comments
