

**Kensington
& Chelsea
Social Council**

Integrating Care → Working
together

What are we doing this time that's different?

This is going to be an interactive session

- Who are we now as a sector?
- Why integrated care?
- What is Integrated Care/Working together
- How is it different to what we are doing?
- Feedback and discussion for 15 minutes

Who are we?

Kensington & Chelsea Voluntary and Community Sector

- Kensington and Chelsea's voluntary and community sector comprises approx. **900** local not-for-profit, non-governmental organisations
- These organisations are non-statutory, but deliver services for wider public benefit and react to the needs of the community.
- Voluntary sector organisations can range from small, informal community groups to social enterprises to large registered charities.

Why Integrated Care/working together is needed?

Too fragmented

Too medicalised

Too hospitalised

Too specialised

Too much history

Too much demand

Too big a funding gap

Too little innovation

Too much variation

1. How do we differ from this model?

2. What can we contribute to bring about real change?

What?

What is Integrated care/working together? Example **My Care My Way**

- Group work

Q: how is it different to what we are doing?

- How are we doing it already?
- **How can we enhance it**
- What works well?
- What could we do better?
- What could we do more of?

Give us one practical example ?

Feedback

- Feedback from groups and discussion
